

Certification of No Adverse Impact

This is to certify that I am a duly qualified registered Professional Engineer licensed to practice in the State of Colorado. It is to further certify that the floodplain development activities or map amendment proposal referred to as:

for the floodplain associated with the following flooding source(s):

will not create an adverse impact, including:

- Increasing in the base flood elevation or floodway on a structure
- Modifying the extent of the floodway or floodplain to create an adverse impact to a structure
- Creating a hazard related to scour, erosion, or sedimentation

The following documents are provided with this certification which support my findings:

Date:

Signature:

Printed Name:

Title:
